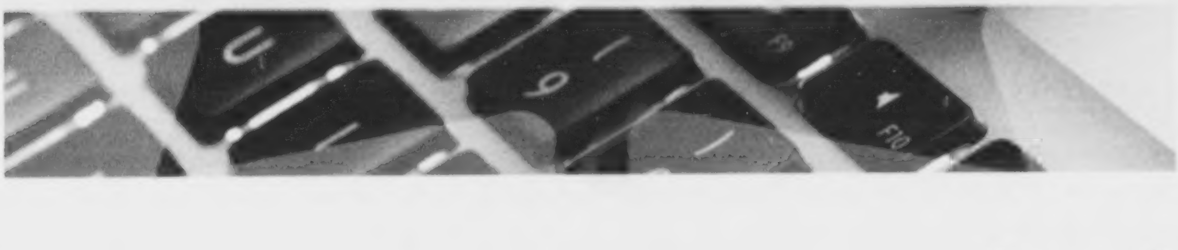
Trade-marks Journal

2017-10-18 — Vol. 64 No. 3286



Canada

Trade-marks Journal

Vol. 64 No. 3286

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

(1) Computer hardware; computer hardware, namely, integrated circuits, semiconductors and chipsets; computer software for the display of digital media, namely for use in the display of computer and video games, and for use in the storage of electronic gaming data; handheld entertainment device, namely, portable digital audio, video and multimedia players, transmitters and receivers namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smartphones, video phones, portable electronic book readers, digital cameras, global positioning systems namely personal digital assistants featuring a GPS receiver and electronic maps, personal digital assistants, television receivers, portable radios for use with text, audio, video, images, still and motion pictures, graphics, computer games, video games, signals, messages, multimedia files, and for accessing global computer and communication networks in the field of gaming technology and graphics software; mobile entertainment device, namely, portable digital audio, video and multimedia players, transmitters and receivers namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smartphones, video phones, portable electronic book readers, digital cameras, global positioning systems namely personal digital assistants featuring a GPS receiver and electronic maps, personal digital assistants, television receivers, portable radios for use with text, audio, video , images, still and motion pictures, graphics, computer games, video games, signals, messages, multimedia files, and for accessing global computer and communication networks in the field of gaming technology and graphics software; computer software for management, storage and network management of digital media in the fields of video games and computer games and for the enhancement of graphical video display; electronic game streaming devices, namely, portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smart phones, video phones, portable electronic book readers; video games and computer games;

mobile digital computing devices, namely, portable digital audio, video and multimedia players, transmitters and receivers namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smartphones, video phones, portable electronic book readers, digital cameras, global positioning systems namely personal digital assistants featuring a GPS receiver and electronic maps, personal digital assistants, television receivers, portable radios for use with text, audio, video, images, still and motion pictures, graphics, computer games, video games, signals, messages, multimedia files, and for accessing global computer and communication networks in the field of gaming technology and graphics software; handheld electronic devices, namely, portable digital audio, video and multimedia players, transmitters and receivers namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smartphones, video phones, portable electronic book readers, digital cameras, global positioning systems namely personal digital assistants featuring a GPS receiver and electronic maps, personal digital assistants, television receivers, portable radios for use with text, audio, video , images, still and motion pictures, graphics, computer games, video games, signals, messages, multimedia files, and for accessing global computer and communication networks in the field of gaming technology and graphics software; electronic publications recorded on computer media, in the nature of books, manuals, magazines e-zines and newsletters featuring information regarding electronic game devices and electronic games; software used for gaming and the storage of electronic data in the field of games; computer software for enhancing computer game performance ; audio and video receivers; digital audio and video players; electronic gaming machines for use with an external display screen or monitor; electronic display screens; flat panel display screens; LCD display screens; computer, video and touch screen monitors; computer screens; projection screens; video screens; integrated circuits; graphics processing units (GPUs); computer servers; digital media servers, namely computer servers used to store and transmit electronic signals to media players in the field of gaming and graphics software; network servers; digital media streaming devices, namely MP3 players, MP4 players, MPEG players, CD players, DVD players, notebook computers, computer disc players, portable TVs, mobile computers, handheld computers, personal digital assistants, tablet computers, electronic personal organizers, electronic notepads, mobile phones, smartphones, video phones, portable electronic book readers, digital cameras, global positioning systems namely personal digital assistants featuring a GPS receiver and electronic maps, personal digital assistants, television receivers, portable radios, audio amplifiers, microphones and speakers; computer software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets and micro-processors; computer graphics software; downloadable computer graphics; software in the form of downloadable computer graphics tools for the creation, editing and rendering of downloadable computer graphics for advanced graphics processing, for managing and implementing virtual desktop infrastructures, for virtual desktops and applications, and for virtualization technology software; computer hardware and computer software for professional designers, engineers, and scientists for advanced graphics processing and visual computing; computer hardware and computer software for professional designers, engineers, and scientists for advanced graphics processing and visual computing sold as an integral component of computers; integrated circuit components for graphics and video systems, namely, multimedia accelerators, graphic accelerators and peripheral units; and computer software for operating and managing the said integrated circuit components

(2) Handheld units for playing electronic, computer, interactive, and video games; electronic video game machines other than those adapted for use with an external display screen or monitor for receipt, storage and transmission of text, graphics and multimedia content; Gaming devices, namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smart phones, video phones; mobile gaming devices, namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smart phones, video phones, portable electronic book readers; mobile portable gaming devices, namely portable MP3 players, portable MP4 players, portable MPEG players, portable CD players, portable DVD players, notebook computers, portable computer disc players, portable TVs, mobile computers, handheld computers, portable personal digital assistants, tablet computers, portable personal computers, portable electronic personal organizers, portable electronic notepads, mobile phones, smart phones, video phones

SERVICES

(1) Streaming of digital media content for others on the internet, namely text, audio, video, images, still and motion pictures, graphics, computer games, video games, signals, messages and multimedia files; streaming of electronic games on the Internet; web streaming of audio, video and visual material to mobile digital computing devices in the field of online gaming, computer games and video games; digital streaming of electronic games via the internet; transmission of audiovisual content, namely motion pictures, television programming, videos, music and games

(2) Entertainment services, namely, providing electronic games on-line; entertainment services, namely, providing an internet website portal featuring online video and electronic games; providing temporary use of non-downloadable interactive multiplayer computer and video games that may be accessed and played over computer networks and global communications networks; providing entertainment information relating to video games and computer games; providing online news, information and game strategies all related to electronic, computer and video games; providing electronic publications in the nature of newsletters delivered by electronic mail containing information regarding electronics, software programming and computer gaming; providing training sessions at tradeshows and computer- and hardware-developers' conferences in the electronics field and providing training course materials together therewith; entertainment services, namely, providing computer games online via a global computer network; providing information commentary and articles in the field of computer gaming, all online via a global computer network

(3) Technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems; troubleshooting in the nature of diagnosing problems with consumer electronics; platform as a service (PAAS) featuring computer software platforms for downloading, storing, viewing, playing and interacting with digital content, namely text, audio, video , images, still and motion pictures, graphics, computer games, video games, signals, messages, multimedia files, in the field of gaming technology, technology related to digital music, photos and videos, technology for social applications, and graphics software; consulting services in the field of gaming technology and graphics software; computer programming services for customers that enable the customers' digital and handheld devices to download and utilize games and entertainment related content; software as a service, namely, providing a customer service

software platform to enable interaction between customers and service representatives to resolve product issues; providing temporary use of non-downloadable computer software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets and micro-processors, and for gaming purposes; providing temporary use of non-downloadable computer software for computer graphics; providing temporary use of non-downloadable electronic game software; platform as a service (PaaS) featuring computer software platforms for electronic gaming and graphic design; providing virtual computer systems and virtual computer environments through cloud computing; providing cloud computing services featuring software for use in application development for entertainment, social, financial, business collaborative, gaming, and integration of private and public cloud computing environments; cloud computing featuring software used to host, manage, develop and maintain applications, software and websites for managing and implementing virtual desktop infrastructures, for virtual desktops and applications, for virtualization technology software, and remote management and delivery services of real-time gaming and graphics data to computers, handheld computers, and mobile electronic devices; computer services, namely cloud hosting provider services; providing virtual computer systems, graphics processing units (GPUs), and virtual computer environments through cloud computing; design of computer hardware, software and peripherals for others

Modus Automation

Goods

(1) Computer software for system integration for automation solutions, namely, the operation and control of industrial plants, for use in the fields of alternative energy, chemical, food and beverage, industrial energy, life sciences, marine, metals and mining, oil and gas, power, pulp and paper, oil and fuel refining, water and waste water.

(2) Computer software for system integration for monitoring, managing and analyzing industrial process machinery for use in the fields of industrial automation, network power, process management and climate technologies applications.

(3) Computer software for system integration for the operation and control of rotating machinery and process instrumentation of industrial plants for use in the fields of alternative energy, chemical, food and beverage, industrial energy, life sciences, marine, metals and mining, oil and gas, power, pulp and paper, oil and fuel refining, water and waste water.

(4) Computer software for system integration for collecting, analyzing, sharing and utilizing data in the area of regulatory compliance; Computer software for project, industrial plant and facilities management in the field of regulatory compliance for equipment testing for use in the fields of alternative energy, chemical, food and beverage, industrial energy, life sciences, marine, metals and mining, oil and gas, power, pulp and paper, oil and fuel refining, water and waste water.; Computer software for sensing and reporting process and equipment abnormalities, batch application software, namely in the area of industrial plant and facilities equipment testing; Computer software for configuring communication measuring and calculating values, and providing access to diagnostic messages and historical data in the field of industrial plant and facilities equipment testing.

(5) Computer software for system integration for the digital display and real-time analysis of business data and key performance indicators (KPIs), namely, building charts, graphs, diagrams, maps, digital dashboards, and scorecards all in the field of business management.

SERVICES

(1) Planning, design and implementation in the field of virtualization technologies for enterprises and businesses.

(2) Computer design services in the field of system control and data acquisition (SCADA) for checking systems to control processes for oil and gas facilities.

(3) Information technology services, namely, computer hardware and software for help desk and customer support management, on-site management of computer software and hardware, computer diagnostic services, troubleshooting in the nature of diagnostic computer hardware and software problems and troubleshooting of computer software problems, customer service in the field of computer servicing, namely, computer software and hardware infrastructure, operating systems, database systems and web applications, maintenance, support, installation and configuration of computer software.

(4) Information technology services, namely, planning and providing of internet access on control systems and planning procedures and processes through the use of custom design software solutions in the oil and gas, petrochemical, pipeline and energy industries.

(5) Engineering services, namely technical analysis and advisory services in the field of electronic control systems for industrial plants.

THE HOGTOWN FOLLIES

Goods

Promotional items, namely, decals, key chains, hats, t-shirts, ornamental pins, crests, pens, bracelets, earrings, jewelry, scarves, gloves and umbrellas; Certificates, namely, printed achievement certificates, trophies, printed awards, and plaques to recognize achievements in fundraising; Printed materials, namely, brochures and newsletters in the field of fundraising.

SERVICES

Charitable fundraising services; Fundraising services; Fundraising services in the nature of organizing, conducting and promoting events namely community events, festivals, parades, concerts, shows, parties, and live performances; Recognition and awards programs, namely, honoring and recognizing others for achievements in fundraising; Provision of tours and seminars to individuals and groups, namely, sightseeing tours.

CLAIMS

Proposed Use in CANADA on goods and on services

Application Number 1,749,553 **Filing Date** 2015-10-07

TRADEMARK

ARIVANO

Foreign Character Translation/Transliteration
The translation provided by the applicant of the word ARIVANO is "evening".

SERVICES

(1) Marketing services, namely, arranging and conducting advertising campaigns for the products and services of others, providing marketing strategies, brand image consulting, evaluating markets for the existing products and services of others, writing posts and articles for distribution via social media and social networking websites, monitoring public feedback on social media and social networking websites, and designing, printing and collecting marketing information

(2) Arranging and conducting marketing services namely producing websites, promotional audio visual recordings, and social media management for others.Operating a website providing information in the fields of marketing and promoting products and services for sale, online marketing of products and services, and managing the public image of a business brand

(3) Photography and videography services.

(4) Website design and development services; Graphic art design; Search engine optimization services, namely, editing website content in order to have it appear as a more relevant search result on Internet search engines

CLAIMS

Used in CANADA since January 01, 2015 on services (2), (3), (4); June 01, 2015 on services (1).

Application Number 1,750,929 **Filing Date** 2015-10-16

INNOVISTA SENSORS

Goods

Class 07

(1) electric motors and actuators for machines for use in electronic and mechanical aviation equipment to initiate, sustain and control motion or force in the aerospace and military industries

Class 09

(2) pressure sensors; inertial sensors; fluid level sensors; media quality sensors; seat belt tension sensors; position sensors; programmable digital readout counters; digital or analog readout devices , namely electrical regulators and controllers; readout systems, namely, electronic display interfaces; electronic control systems for machines, namely, microcontrols; solid-state relays; power, speed and temperature controls for aircraft; electric control devices for power, speed, and temperature; trackballs; navigation sub-systems for aircraft in the form of on-board computers; navigation sub-systems, namely, navigation apparatus for vehicles; cockpit operator controls, namely, aircraft cockpit control panels and modules; simulators for driving or control of vehicles, namely, cockpit operator controls; circuit protection devices, namely, circuit breakers, electronic circuit closers, circuit boards, and circuit overload protector devices; force sensors; optical scanners; electronic servo controlled circuits; electronic equipment for the detection, measurement or control of motion or pressure, namely, motion sensors, pressure gauges, pressure relief valves, pressure switches and motion detectors; accelerometers; potentiometers; shaft encoders for use with ink jet coding and marking printers and laser marking and coding apparatus; shaft encoders for longitudinal and angle measuring; linear encoders for longitudinal and angle measuring; gyroscopes; angular rate of change devices, namely, angular rate of change sensors; micro-electromechnical structures, namely, electromechanical devices for preventing squirrels and other animals from accessing bird seed in feeders; fluidic control circuits; optical control circuits; angular rate of change sensors; angular rate sensors; Optical electronic encoders for converting position and motion into digital information; digital tachometer encoders for measuring speed, acceleration and deceleration of aircraft; Motor-Optical encoders for converting position and motion into digital information; programmable servo control units for industrial use for machines, consisting of digital servo drives; capacitive pressure sensors; sensors for detecting the quality of liquid or gas media; digital readouts, namely, electronic display interfaces; electrical controllers, namely, micro-controllers; electrical controllers, namely, micro-controllers for micro-programmable logic controllers, control relays, timers, counters, temperature controllers and safety relays; micro-programmable logic controllers, namely, micro-computers; electrical controllers, namely,

micro-programmable logic controllers; control relays, namely, electric relays; electric relays, namely , control relays; digital timers for use in aircraft and other vehicles; Geiger counter; particle counters to measure air quality; counters, namely, thread counters; temperature controllers, namely, automatic temperature regulators for central heating radiators, electromechanical controls for room thermostats and thermostats; temperature controllers for controlling the temperature in rooms in which electronics are stored; safety relays, namely, electric relays of safety control systems; electrical safety relays; electrical solid state relays; navigation sub-systems for vehicles, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; electric or electronic sensors for monitoring rotation rate; electronic solid state contactors for use in controlling electric motors; electric timers for use in aircraft and other vehicles; optical encoders for converting position and motion into digital information; solid state angular rate sensors; rotation rate sensors; electronic multi-axis inertial sensors for guidance of vehicles; electronic three-axis inertial sensors for guidance of vehicles; electronic sensors for monitoring rotation rate; electric sensors for monitoring rotation rate; digital encoders for converting position and motion into digital information; radio transmitters and receivers; transmitters of electric signals; electronic transmitters and receivers for value measurement of pressure, temperature, and position ; electrical and electronic apparatus and instruments, namely breakers and disconnectors; motors and drive units for computer apparatus; electric motors, not for land use; power controllers and electric actuators; brushless dc electric motors and linear actuators for use with drives and controllers in electrically powered aircraft; electric motors for machines, namely, brushless dc motors and electric actuators, namely, linear actuators, all for use with drives and controllers; electronic logic controllers for industrial machinery; programmable logic controllers; software for the operation and control of pressure sensors; software for running automated installations; software for use in cockpit operator controls, namely, aircraft cockpit control panels and modules; software for the operation and control of electric relays; software for the operation and control of digital timers for use in aircraft; software for the operation and control of electric actuators for aircraft; software for the operation and control of electronic logic controllers for industrial machinery; pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry; position sensors, readout systems, namely, electronic display interfaces, pressure sensors, electrical controlling devices, namely, micro-controls, electrical solid-state relays, trackballs, electric actuators for industrial applications; position sensors, inertial sensors, navigation sub-systems, namely, navigation apparatus for vehicles, cockpit operator controls, namely, computers for managing control devices for aircraft, circuit overload protection devices, force sensors, pressure sensors, optical scanners and electronic servo controlled circuits for the aerospace and military industries; electronic equipment for the detection, measurement or control of motion or pressure, namely, sensors, accelerometers, potentiometers, shaft encoders, linear encoders, gyroscopes and angular rate of change devices, electronic servo control circuits, and micro-electromechnical structures, namely, pressure sensors, fluidic and optical control circuits , accelerometers, gyroscopes and angular rate of change sensors; microprocessors; drive amplifiers; control units, namely, control panels; computer power supplies; high-frequency switching power supplies; uninterruptible power supplies; voltage stabilizing power supply; digital displays for use in aircraft cockpits; digital signage display panels; electronic filters for signal processing; electronic filters, namely computer screen filters; electric micro-circuits; alarm monitoring systems, namely, alarm systems, alarm detectors, and alarm transmitters; alarm detectors; alarm transmitters; central station receivers and decoders for receiving and processing information received from aircraft; central station receivers and decoders, namely, television receivers and decoders; industrial measurement instrumentation, namely, electric sensors, electronic transducers and controllers for use in measuring and controlling pressure, temperature, position, chemical composition, tilt and engine conditions, and for use as components of industrial equipment, namely industrial compressors, hydraulic fluid pressure regulators, steam sterilizers, laboratory test apparatus, chemical equipment, medical equipment, atmospheric pressure measurement equipment, machine tools, plant automation equipment, pneumatic and industrial plant pressure measuring and controlling equipment, and equipment for pressure measurements of aggressive fluids and in the automotive, aerospace, hvac (heating, ventilation, air conditioning), diesel, marine, medical and agriculture fields; software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines, or machine fleets, namely , aircraft cockpit controls; software for database management in the field of aviation and military aircraft; apparatus and instruments for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets, namely, electric measuring sensors, motion detectors, electric actuators, man-machine interfaces, namely, electronic display interfaces, data recorders, electric connectors, memory cards, network servers, communication networks, namely, network hubs, communication bus, namely, a communication hub, and touch screens; computer central processing units; remote data processing units; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking, supervision, life-saving, and teaching apparatus and instruments, namely, test equipment and equipment for measuring temperature, pressure and position; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, adapters, conduits, connection and distribution panels, electric accumulators, electric power converters and inverters, electrical pipes, electrical couplings, electrical capacitors, electrical conductors, electrical cables, millimeters; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electricity conduits; apparatus for recording, transmission and reproduction of sound or images, namely, CD players, compact disc players, DVD players, MP3 players, digital audio players, audio recorders; Blank magnetic data carriers; blank recording discs; automatic vending machines and control mechanisms for coin-operated vending and dispensing machines, namely cameras, software for motion and distance detection, infrared sensors, thermal sensors and displacement transducers; cash registers, calculating machines, data processing equipment, namely, computer scanners, laser scanners and optical scanners; fire-extinguishing apparatus, namely, fire extinguishers and fire extinguishing blankets; Radar detectors; pressure switches; pneumatic logic components, namely, pneumatic valves and pneumatic actuators; electro pneumatic valves; industrial vacuum components, namely, vacuum pumps, vacuum gauges, vacuum bottles, and vacuum cleaners for industrial purposes; Industrial vacuum components, namely, motors and pneumatic valves; air compressors; compressed air automation systems, namely, compressors; Electric motors for machines, namely, DC motors, brush dc motors, and brushless dc motors; brushed dc motors for use in industrial machinery; brushless dc motors for use in industrial machinery; rotary voice coil actuators for use in automated industrial machinery; electric rotary voice coil actuators; linear voice coil actuators for use in automated industrial machinery; electric linear voice coil actuators; smart voice coil actuators for use in automated industrial machinery; electric smart voice coil actuators; brushless dc motor electronic controllers; dc motor electronic controllers; brush dc motor electronic controllers; electric voice coil actuators; global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; electronic navigational instruments, namely, inertial navigation systems; inertial measurement unit, namely, an electronic device for measuring and reporting position, force, acceleration, angular rate, and magnetic fields, using accelerometers, sensors, gyroscopes, and magnetometers; multi-axis inertial sensing system , namely, a system of multiple sensors, gyroscopes, accelerometers, and magnetometers for measuring and reporting position, force, acceleration, angular rate, and magnetic fields; angular gyroscope; analog gyroscope; remote control circuit breakers; circuit breakers; simulators for driving or control of vehicles, namely, cockpit controls; speed brake; landing gear control; steering handwheel; flight spoiler control level; Optical rotary encoders for tracking shaft rotation to generate digital position and motion information; Magnetic rotary encoders for tracking shaft rotation to generate digital position and motion information; hall effect sensors; rotary and linear potentiometers; draw wire sensors; inclinometers; electronic modules, namely, integrated circuit modules; electronic display interface, namely, wireless encoder interface; inductive proximity sensors; inductive sensors with remote electronics; electronic display interface, namely, digital readout systems; ceramic capacitive pressure sensors; silicon capacitive pressure sensors; panel mount solid state relays; PC board mount solid state relays; din rail mount solid state relays; plug-in solid state relays; solid state relay timers; control solid state relays; digital input and output scanners; integrated circuit modules, namely, digital input/output modules; heat sink and solid state relays assemblies; electrical limit switches for use in industrial machinery; electric limit switches for aerospace and defense applications; limit switches for industrial applications; electrical micro-switches; manually operated power switches; electrical power distribution blocks; electric power generators; electric power converters; power amplifiers; power transformers; power technologies, namely, switches; high-frequency switching power supplies; power switching, namely , power switches; power management, namely, power equipment for power switching; power storage, namely, electrical storage batteries

Class 16

(3) Printed matters, namely, printed calendars; brochures, catalogues and leaflets; user and instruction manuals; user and application guides

SERVICES

Class 37

(1) remote maintenance of automated installations, of machines and of parts of machinery, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 38

(2) telecommunication services, namely transmission by satellite of technical data and technical information in the field of the state and the operation of automated installations, of machines and of parts of machinery, namely, measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens; remote management services (supervision and checking) of automated installations, of machines and of parts of machinery via Internet, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 40

(3) custom manufacture of sensors; custom manufacture of pressure sensors; custom manufacture of inertial sensors; custom manufacture of fluid level sensors; custom manufacture of sensors for detecting the quality of liquid or gas media; custom manufacture of position sensors; custom manufacture of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom manufacture of programmable logic controllers; custom manufacture of logic controllers; custom manufacture of control relays; custom

manufacture of timers; custom manufacture of counters; custom manufacture of temperature controllers; custom manufacture of safety relays; custom manufacture of micro-controls; custom manufacture of solid state relays; custom manufacture of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom manufacture of electronic motors; custom manufacture of actuators; custom manufacture of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom manufacture of force sensors; custom manufacture of navigation sub-systems; custom manufacture of media quality sensors; custom manufacture of seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; custom manufacture of industrial measurement instrumentation, namely, sensors, transducers and controls; custom manufacture of industrial measurement instrumentation; custom manufacture of position detectors; custom manufacture of pressure switches; custom manufacture of pneumatic logic components; custom manufacture of electro pneumatic valves; custom manufacture of industrial vacuum components; custom manufacture of compressed air automation systems; custom manufacture of DC motors; custom manufacture of brush dc motors; custom manufacture of brushless dc motors; custom manufacture of rotary voice coil actuators; custom manufacture of linear voice coil actuators; custom manufacture of smart voice coil actuators; custom manufacture of brushless dc motor controllers; custom manufacture of dc motor controllers; custom manufacture of brush dc motor controllers; custom manufacture of voice coil actuators; custom manufacture of GPS; custom manufacture of inertial navigation systems; custom manufacture of inertial measurement unit; custom manufacture of multi-axis inertial sensing system; custom manufacture of angular gyroscope; custom manufacture of analog gyroscope; custom manufacture of remote control circuit breakers; custom manufacture of circuit breakers; custom manufacture of timers; custom manufacture of relays; custom manufacture of control relays; custom manufacture of counters; custom manufacture of safety relays; custom manufacture of temperature controllers; custom manufacture of cockpit controls; custom manufacture of speed brake; custom manufacture of landing gear control; custom manufacture of steering handwheel; custom manufacture of flight spoiler control level; custom manufacture of optical rotary encoders; custom manufacture of magnetic rotary encoders; custom manufacture of hall effect sensors; custom manufacture of rotary and linear potentiometers; custom manufacture of draw wire sensors; custom manufacture of inclinometers; custom manufacture of electronic modules; custom manufacture of wireless encoder interface; custom manufacture of inductive proximity sensors; custom manufacture of inductive sensors with remote electronics; custom manufacture of digital readout systems; custom manufacture of linear encoders; custom manufacture of digital readout encoders; custom manufacture of ceramic capacitive pressure sensors; custom manufacture of silicon capacitive pressure sensors; custom manufacture of panel mount solid state relays; custom manufacture of PC board mount solid state relays; custom manufacture of din rail mount solid state relays; custom manufacture of plug-in solid state relays; custom manufacture of solid state relay timers; custom manufacture of control solid state relays; custom manufacture of digital input/output modules; custom manufacture of heat sink and solid state relays assemblies; custom manufacture of limit switches for industrial applications; custom manufacture of limit switches for aerospace and defense applications; custom manufacture of limit switches; custom manufacture of microswitches; custom manufacture of manually operated switches; custom manufacture of power technologies; custom manufacture of power switching; custom manufacture of power management; custom manufacture of power storage

Class 42

(4) custom design and engineering of sensors; custom design and engineering of pressure sensors ; custom design and engineering of inertial sensors; custom design and engineering of fluid level sensors; custom design and engineering of sensors for detecting the quality of liquid or gas media; custom design and engineering of position sensors; custom design and engineering of micro-controls; custom design and engineering of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom design and engineering of micro-programmable logic controllers; custom design and engineering of programmable logic controllers; custom design and engineering of logic controllers; custom design and engineering of control relays; custom design and engineering of timers; custom design and engineering of counters; custom design and engineering of temperature controllers; custom design and engineering of safety relays; custom design and engineering of solid state relays; custom design and engineering of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom design and engineering of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom design and engineering of force sensors; custom design and engineering of pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; remote supervision, control, and monitoring of automated installations, machines or machine fleets; design and development of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; installation, maintenance and updating of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; online provision of computer applications and software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; remote management, supervision, and control of computer installations, machines or machine fleets via communication systems; research, design and consultancy services in the field of electrical and electronic apparatus and instruments; custom design engineering and consultancy services; customized product design services; custom design and engineering of position detectors; custom design and engineering of pressure switches; custom design and engineering of pneumatic logic components; custom design and engineering of electro pneumatic valves; custom design and engineering of industrial vacuum components; custom design and engineering of compressed air automation systems; custom design and engineering of DC motors; custom design and engineering of brush dc motors; custom design and engineering of brushless dc motors; custom design and engineering of rotary voice coil actuators; custom design and engineering of linear voice coil actuators; custom design and engineering of smart voice coil actuators; custom design and engineering of brushless dc motor controllers; custom design and engineering of dc motor controllers; custom design and engineering of brush dc motor controllers; custom design and engineering of voice coil actuators; custom design and engineering of GPS; custom design and engineering of inertial navigation systems; custom design and engineering of inertial measurement unit; custom design and engineering of multi-axis inertial sensing system; custom design and engineering of angular gyroscope; custom design and engineering of analog gyroscope; custom design and engineering of remote control circuit breakers ; custom design and engineering of circuit breakers; custom design and engineering of timers; custom design and engineering of relays; custom design and engineering of control relays; custom design and engineering of counters; custom design and engineering of safety relays; custom

design and engineering of temperature controllers; custom design and engineering of cockpit controls; custom design and engineering of speed brake; custom design and engineering of landing gear control; custom design and engineering of steering handwheel; custom design and engineering of flight spoiler control level; custom design and engineering of optical rotary encoders; custom design and engineering of magnetic rotary encoders; custom design and engineering of hall effect sensors; custom design and engineering of rotary and linear potentiometers; custom design and engineering of draw wire sensors; custom design and engineering of inclinometers; custom design and engineering of electronic modules; custom design and engineering of wireless encoder interface; custom design and engineering of inductive proximity sensors; custom design and engineering of inductive sensors with remote electronics; custom design and engineering of digital readout systems; custom design and engineering of linear encoders; custom design and engineering of digital readout encoders; custom design and engineering of ceramic capacitive pressure sensors; custom design and engineering of silicon capacitive pressure sensors; custom design and engineering of panel mount solid state relays; custom design and engineering of PC board mount solid state relays; custom design and engineering of din rail mount solid state relays; custom design and engineering of plug-in solid state relays; custom design and engineering of solid state relay timers; custom design and engineering of control solid state relays; custom design and engineering of digital input/output modules; custom design and engineering of heat sink and solid state relays assemblies; custom design and engineering of limit switches for industrial applications; custom design and engineering of limit switches for aerospace and defense applications; custom design and engineering of limit switches; custom design and engineering of microswitches; custom design and engineering of manually operated switches; custom design and engineering of power technologies; custom design and engineering of power switching; custom design and engineering of power management; custom design and engineering of power storage

Goods

Class 07

(1) electric motors and actuators for machines for use in electronic and mechanical aviation equipment to initiate, sustain and control motion or force in the aerospace and military industries

Class 09

(2) pressure sensors; inertial sensors; fluid level sensors; media quality sensors; seat belt tension sensors; position sensors; programmable digital readout counters; digital or analog readout devices , namely electrical regulators and controllers; readout systems, namely, electronic display interfaces; electronic control systems for machines, namely, microcontrols; solid-state relays; power, speed and temperature controls for aircraft; electric control devices for power, speed, and temperature; trackballs; navigation sub-systems for aircraft in the form of on-board computers; navigation sub-systems, namely, navigation apparatus for vehicles; cockpit operator controls, namely, aircraft cockpit control panels and modules; simulators for driving or control of vehicles, namely, cockpit operator controls; circuit protection devices, namely, circuit breakers, electronic circuit closers, circuit boards, and circuit overload protector devices; force sensors; optical scanners; electronic servo controlled circuits; electronic equipment for the detection, measurement or control of motion or pressure, namely, motion sensors, pressure gauges, pressure relief valves, pressure switches and motion detectors; accelerometers; potentiometers; shaft encoders for use with ink jet coding and marking printers and laser marking and coding apparatus; shaft encoders for longitudinal and angle measuring; linear encoders for longitudinal and angle measuring; gyroscopes; angular rate of change devices, namely, angular rate of change sensors; micro-electromechnical structures, namely, electromechanical devices for preventing squirrels and other animals from accessing bird seed in feeders; fluidic control circuits; optical control circuits; angular rate of change sensors; angular rate sensors; Optical electronic encoders for converting position and motion into digital information; digital tachometer encoders for measuring speed, acceleration and deceleration of aircraft; Motor-Optical encoders for converting position and motion into digital information; programmable servo control units for industrial use for machines, consisting of digital servo drives; capacitive pressure sensors; sensors for detecting the quality of liquid or gas media; digital readouts, namely, electronic display interfaces; electrical controllers, namely, micro-controllers; electrical controllers, namely, micro-controllers for micro-programmable logic controllers, control relays, timers, counters, temperature controllers and safety relays; micro-programmable logic controllers, namely, micro-computers; electrical controllers, namely,

micro-programmable logic controllers; control relays, namely, electric relays; electric relays, namely , control relays; digital timers for use in aircraft and other vehicles; Geiger counter; particle counters to measure air quality; counters, namely, thread counters; temperature controllers, namely, automatic temperature regulators for central heating radiators, electromechanical controls for room thermostats and thermostats; temperature controllers for controlling the temperature in rooms in which electronics are stored; safety relays, namely, electric relays of safety control systems; electrical safety relays; electrical solid state relays; navigation sub-systems for vehicles, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; electric or electronic sensors for monitoring rotation rate; electronic solid state contactors for use in controlling electric motors; electric timers for use in aircraft and other vehicles; optical encoders for converting position and motion into digital information; solid state angular rate sensors; rotation rate sensors; electronic multi-axis inertial sensors for guidance of vehicles; electronic three-axis inertial sensors for guidance of vehicles; electronic sensors for monitoring rotation rate; electric sensors for monitoring rotation rate; digital encoders for converting position and motion into digital information; radio transmitters and receivers; transmitters of electric signals; electronic transmitters and receivers for value measurement of pressure, temperature, and position ; electrical and electronic apparatus and instruments, namely breakers and disconnectors; motors and drive units for computer apparatus; electric motors, not for land use; power controllers and electric actuators; brushless dc electric motors and linear actuators for use with drives and controllers in electrically powered aircraft; electric motors for machines, namely, brushless dc motors and electric actuators, namely, linear actuators, all for use with drives and controllers; electronic logic controllers for industrial machinery; programmable logic controllers; software for the operation and control of pressure sensors; software for running automated installations; software for use in cockpit operator controls, namely, aircraft cockpit control panels and modules; software for the operation and control of electric relays; software for the operation and control of digital timers for use in aircraft; software for the operation and control of electric actuators for aircraft; software for the operation and control of electronic logic controllers for industrial machinery; pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry; position sensors, readout systems, namely, electronic display interfaces, pressure sensors, electrical controlling devices, namely, micro-controls, electrical solid-state relays, trackballs, electric actuators for industrial applications; position sensors, inertial sensors, navigation sub-systems, namely, navigation apparatus for vehicles, cockpit operator controls, namely, computers for managing control devices for aircraft, circuit overload protection devices, force sensors, pressure sensors, optical scanners and electronic servo controlled circuits for the aerospace and military industries; electronic equipment for the detection, measurement or control of motion or pressure, namely, sensors, accelerometers, potentiometers, shaft encoders, linear encoders, gyroscopes and angular rate of change devices, electronic servo control circuits, and micro-electromechnical structures, namely, pressure sensors, fluidic and optical control circuits , accelerometers, gyroscopes and angular rate of change sensors; microprocessors; drive amplifiers; control units, namely, control panels; computer power supplies; high-frequency switching power supplies; uninterruptible power supplies; voltage stabilizing power supply; digital displays for use in aircraft cockpits; digital signage display panels; electronic filters for signal processing; electronic filters, namely computer screen filters; electric micro-circuits; alarm monitoring systems, namely, alarm systems, alarm detectors, and alarm transmitters; alarm detectors; alarm transmitters; central station receivers and decoders for receiving and processing information received from aircraft; central station receivers and decoders, namely, television receivers and decoders; industrial measurement instrumentation, namely, electric sensors, electronic transducers and controllers for use in measuring and controlling pressure, temperature, position, chemical composition, tilt and engine conditions, and for use as components of industrial equipment, namely industrial compressors, hydraulic fluid pressure regulators, steam sterilizers, laboratory test apparatus, chemical equipment, medical equipment, atmospheric pressure measurement equipment, machine tools, plant automation equipment, pneumatic and industrial plant pressure measuring and controlling equipment, and equipment for pressure measurements of aggressive fluids and in the automotive, aerospace, hvac (heating, ventilation, air conditioning), diesel, marine, medical and agriculture fields; software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines, or machine fleets, namely , aircraft cockpit controls; software for database management in the field of aviation and military aircraft; apparatus and instruments for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets, namely, electric measuring sensors, motion detectors, electric actuators, man-machine interfaces, namely, electronic display interfaces, data recorders, electric connectors, memory cards, network servers, communication networks, namely, network hubs, communication bus, namely, a communication hub, and touch screens; computer central processing units; remote data processing units; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking, supervision, life-saving, and teaching apparatus and instruments, namely, test equipment and equipment for measuring temperature, pressure and position; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, adapters, conduits, connection and distribution panels, electric accumulators, electric power converters and inverters, electrical pipes, electrical couplings, electrical capacitors, electrical conductors, electrical cables, millimeters; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electricity conduits; apparatus for recording, transmission and reproduction of sound or images, namely, CD players, compact disc players, DVD players, MP3 players, digital audio players, audio recorders; Blank magnetic data carriers; blank recording discs; automatic vending machines and control mechanisms for coin-operated vending and dispensing machines, namely cameras, software for motion and distance detection, infrared sensors, thermal sensors and displacement transducers; cash registers, calculating machines, data processing equipment, namely, computer scanners, laser scanners and optical scanners; fire-extinguishing apparatus, namely, fire extinguishers and fire extinguishing blankets; Radar detectors; pressure switches; pneumatic logic components, namely, pneumatic valves and pneumatic actuators; electro pneumatic valves; industrial vacuum components, namely, vacuum pumps, vacuum gauges, vacuum bottles, and vacuum cleaners for industrial purposes; Industrial vacuum components, namely, motors and pneumatic valves; air compressors; compressed air automation systems, namely, compressors; Electric motors for machines, namely, DC motors, brush dc motors, and brushless dc motors; brushed dc motors for use in industrial machinery; brushless dc motors for use in industrial machinery; rotary voice coil actuators for use in automated industrial machinery; electric rotary voice coil actuators; linear voice coil actuators for use in automated industrial machinery; electric linear voice coil actuators; smart voice coil actuators for use in automated industrial machinery; electric smart voice coil actuators; brushless dc motor electronic controllers; dc motor electronic controllers; brush dc motor electronic controllers; electric voice coil actuators; global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; electronic navigational instruments, namely, inertial navigation systems; inertial measurement unit, namely, an electronic device for measuring and reporting position, force, acceleration, angular rate, and magnetic fields, using accelerometers, sensors, gyroscopes, and magnetometers; multi-axis inertial sensing system , namely, a system of multiple sensors, gyroscopes, accelerometers, and magnetometers for measuring and reporting position, force, acceleration, angular rate, and magnetic fields; angular gyroscope; analog gyroscope; remote control circuit breakers; circuit breakers; simulators for driving or control of vehicles, namely, cockpit controls; speed brake; landing gear control; steering handwheel; flight spoiler control level; Optical rotary encoders for tracking shaft rotation to generate digital position and motion information; Magnetic rotary encoders for tracking shaft rotation to generate digital position and motion information; hall effect sensors; rotary and linear potentiometers; draw wire sensors; inclinometers; electronic modules, namely, integrated circuit modules; electronic display interface, namely, wireless encoder interface; inductive proximity sensors; inductive sensors with remote electronics; electronic display interface, namely, digital readout systems; ceramic capacitive pressure sensors; silicon capacitive pressure sensors; panel mount solid state relays; PC board mount solid state relays; din rail mount solid state relays; plug-in solid state relays; solid state relay timers; control solid state relays; digital input and output scanners; integrated circuit modules, namely, digital input/output modules; heat sink and solid state relays assemblies; electrical limit switches for use in industrial machinery; electric limit switches for aerospace and defense applications; limit switches for industrial applications; electrical micro-switches; manually operated power switches; electrical power distribution blocks; electric power generators; electric power converters; power amplifiers; power transformers; power technologies, namely, switches; high-frequency switching power supplies; power switching, namely , power switches; power management, namely, power equipment for power switching; power storage, namely, electrical storage batteries

Class 16

(3) Printed matters, namely, printed calendars; brochures, catalogues and leaflets; user and instruction manuals; user and application guides

SERVICES

Class 37

(1) remote maintenance of automated installations, of machines and of parts of machinery, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 38

(2) telecommunication services, namely transmission by satellite of technical data and technical information in the field of the state and the operation of automated installations, of machines and of parts of machinery, namely, measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens; remote management services (supervision and checking) of automated installations, of machines and of parts of machinery via Internet, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 40

(3) custom manufacture of sensors; custom manufacture of pressure sensors; custom manufacture of inertial sensors; custom manufacture of fluid level sensors; custom manufacture of sensors for detecting the quality of liquid or gas media; custom manufacture of position sensors; custom manufacture of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom manufacture of programmable logic controllers; custom manufacture of logic controllers; custom manufacture of control relays; custom

manufacture of timers; custom manufacture of counters; custom manufacture of temperature controllers; custom manufacture of safety relays; custom manufacture of micro-controls; custom manufacture of solid state relays; custom manufacture of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom manufacture of electronic motors; custom manufacture of actuators; custom manufacture of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom manufacture of force sensors; custom manufacture of navigation sub-systems; custom manufacture of media quality sensors; custom manufacture of seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; custom manufacture of industrial measurement instrumentation, namely, sensors, transducers and controls; custom manufacture of industrial measurement instrumentation; custom manufacture of position detectors; custom manufacture of pressure switches; custom manufacture of pneumatic logic components; custom manufacture of electro pneumatic valves; custom manufacture of industrial vacuum components; custom manufacture of compressed air automation systems; custom manufacture of DC motors; custom manufacture of brush dc motors; custom manufacture of brushless dc motors; custom manufacture of rotary voice coil actuators; custom manufacture of linear voice coil actuators; custom manufacture of smart voice coil actuators; custom manufacture of brushless dc motor controllers; custom manufacture of dc motor controllers; custom manufacture of brush dc motor controllers; custom manufacture of voice coil actuators; custom manufacture of GPS; custom manufacture of inertial navigation systems; custom manufacture of inertial measurement unit; custom manufacture of multi-axis inertial sensing system; custom manufacture of angular gyroscope; custom manufacture of analog gyroscope; custom manufacture of remote control circuit breakers; custom manufacture of circuit breakers; custom manufacture of timers; custom manufacture of relays; custom manufacture of control relays; custom manufacture of counters; custom manufacture of safety relays; custom manufacture of temperature controllers; custom manufacture of cockpit controls; custom manufacture of speed brake; custom manufacture of landing gear control; custom manufacture of steering handwheel; custom manufacture of flight spoiler control level; custom manufacture of optical rotary encoders; custom manufacture of magnetic rotary encoders; custom manufacture of hall effect sensors; custom manufacture of rotary and linear potentiometers; custom manufacture of draw wire sensors; custom manufacture of inclinometers; custom manufacture of electronic modules; custom manufacture of wireless encoder interface; custom manufacture of inductive proximity sensors; custom manufacture of inductive sensors with remote electronics; custom manufacture of digital readout systems; custom manufacture of linear encoders; custom manufacture of digital readout encoders; custom manufacture of ceramic capacitive pressure sensors; custom manufacture of silicon capacitive pressure sensors; custom manufacture of panel mount solid state relays; custom manufacture of PC board mount solid state relays; custom manufacture of din rail mount solid state relays; custom manufacture of plug-in solid state relays; custom manufacture of solid state relay timers; custom manufacture of control solid state relays; custom manufacture of digital input/output modules; custom manufacture of heat sink and solid state relays assemblies; custom manufacture of limit switches for industrial applications; custom manufacture of limit switches for aerospace and defense applications; custom manufacture of limit switches; custom manufacture of microswitches; custom manufacture of manually operated switches; custom manufacture of power technologies; custom manufacture of power switching; custom manufacture of power management; custom manufacture of power storage

Class 42

(4) custom design and engineering of sensors; custom design and engineering of pressure sensors ; custom design and engineering of inertial sensors; custom design and engineering of fluid level sensors; custom design and engineering of sensors for detecting the quality of liquid or gas media; custom design and engineering of position sensors; custom design and engineering of micro-controls; custom design and engineering of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom design and engineering of micro-programmable logic controllers; custom design and engineering of programmable logic controllers; custom design and engineering of logic controllers; custom design and engineering of control relays; custom design and engineering of timers; custom design and engineering of counters; custom design and engineering of temperature controllers; custom design and engineering of safety relays; custom design and engineering of solid state relays; custom design and engineering of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom design and engineering of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom design and engineering of force sensors; custom design and engineering of pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; remote supervision, control, and monitoring of automated installations, machines or machine fleets; design and development of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; installation, maintenance and updating of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; online provision of computer applications and software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; remote management, supervision, and control of computer installations, machines or machine fleets via communication systems; research, design and consultancy services in the field of electrical and electronic apparatus and instruments; custom design engineering and consultancy services; customized product design services; custom design and engineering of position detectors; custom design and engineering of pressure switches; custom design and engineering of pneumatic logic components; custom design and engineering of electro pneumatic valves; custom design and engineering of industrial vacuum components; custom design and engineering of compressed air automation systems; custom design and engineering of DC motors; custom design and engineering of brush dc motors; custom design and engineering of brushless dc motors; custom design and engineering of rotary voice coil actuators; custom design and engineering of linear voice coil actuators; custom design and engineering of smart voice coil actuators; custom design and engineering of brushless dc motor controllers; custom design and engineering of dc motor controllers; custom design and engineering of brush dc motor controllers; custom design and engineering of voice coil actuators; custom design and engineering of GPS; custom design and engineering of inertial navigation systems; custom design and engineering of inertial measurement unit; custom design and engineering of multi-axis inertial sensing system; custom design and engineering of angular gyroscope; custom design and engineering of analog gyroscope; custom design and engineering of remote control circuit breakers ; custom design and engineering of circuit breakers; custom design and engineering of timers; custom design and engineering of relays; custom design and engineering of control relays; custom design and engineering of counters; custom design and engineering of safety relays; custom

design and engineering of temperature controllers; custom design and engineering of cockpit controls; custom design and engineering of speed brake; custom design and engineering of landing gear control; custom design and engineering of steering handwheel; custom design and engineering of flight spoiler control level; custom design and engineering of optical rotary encoders; custom design and engineering of magnetic rotary encoders; custom design and engineering of hall effect sensors; custom design and engineering of rotary and linear potentiometers; custom design and engineering of draw wire sensors; custom design and engineering of inclinometers; custom design and engineering of electronic modules; custom design and engineering of wireless encoder interface; custom design and engineering of inductive proximity sensors; custom design and engineering of inductive sensors with remote electronics; custom design and engineering of digital readout systems; custom design and engineering of linear encoders; custom design and engineering of digital readout encoders; custom design and engineering of ceramic capacitive pressure sensors; custom design and engineering of silicon capacitive pressure sensors; custom design and engineering of panel mount solid state relays; custom design and engineering of PC board mount solid state relays; custom design and engineering of din rail mount solid state relays; custom design and engineering of plug-in solid state relays; custom design and engineering of solid state relay timers; custom design and engineering of control solid state relays; custom design and engineering of digital input/output modules; custom design and engineering of heat sink and solid state relays assemblies; custom design and engineering of limit switches for industrial applications; custom design and engineering of limit switches for aerospace and defense applications; custom design and engineering of limit switches; custom design and engineering of microswitches; custom design and engineering of manually operated switches; custom design and engineering of power technologies; custom design and engineering of power switching; custom design and engineering of power management; custom design and engineering of power storage

Goods

Class 09

(1) Audio recordings and video recordings featuring entertainment and information in the field of basketball; audio discs, video discs, computer laser discs, pre-recorded audio and video cassettes, pre-recorded audio and video tapes, pre-recorded compact discs, pre-recorded computer laser discs, all featuring entertainment and information related to basketball; computer accessories, namely blank USB flash drives, computer stands, mouse pads, mice, disc cases, computer carry-on cases, computer sleeves, keyboard wrist pads, all related to basketball; computer programs for viewing information, statistics or trivia about basketball; computer software, namely screen savers featuring basketball themes; computer software to access and view computer wallpaper; computer browser software for use in viewing and displaying data on the Internet; computer skins, namely, fitted plastic film for covering and providing a scratch proof barrier for computer devices; computer video games; computer games downloadable from a global computer network; computer games for use on mobile and cellular phones; video games, video game cartridges; radios, electronic audio speakers, headphones and ear buds, wireless telephones, telephones; cell phone accessories, namely headsets, skins, face plates and cell phone covers; electronics accessories, namely skins, covers and stands for MP3 players, electronic tablets and portable personal digital assistants; decorative switch plate covers, video monitors, computer monitors, binoculars; sunglasses; eyeglass frames; eyewear straps and chains; eyeglass and

sunglass cases; magnets; disposable cameras; credit cards and pre-paid telephone calling cards magnetically encoded; downloadable video recordings, video stream recordings, and downloadable audio recordings in the field of basketball provided over the Internet; downloadable computer software for viewing databases of information, statistical information, trivia, polling information, and interactive polling in the field of basketball provided over the Internet; downloadable computer game software; downloadable interactive video games and downloadable trivia game software provided over the internet; downloadable computer software for use as screensavers and wallpaper , to access and display computer browsers, for use in viewing data on the Internet, for use in designing plastic film computer skins to protect computer monitors, for use in creating avatars for playing games and for use in remotely manipulating computer cursors over the Internet; downloadable electronic publications in the nature of magazines, newsletters, coloring books, game schedules all in the field of basketball provided over the Internet; downloadable catalogs provided over the Internet featuring an array of basketball-themed products; downloadable greeting cards provided over the Internet.

Class 12

(2) License plate holders.

Class 14

(3) Pendants, cuff links, earrings, bracelets, jewelry; costume jewelry; beaded jewelry; beaded necklaces; beads for use in the manufacture of jewelry; clocks; wrist and pocket watches; watch bands and watch straps, watch cases, watch fobs; necklaces made of precious metals; banks; lapel pins; jewelry boxes, decorative boxes; money clips made of precious metals and precious stones; tie clips; medallions; pins, non-monetary coins of precious metals; precious metals; figures and figurines of precious metals; trophies, and wall clocks

Class 16

(4) Publications and printed matter, namely basketball trading cards, trading cards, stickers, decals, commemorative basketball stamps (specifically excluding postage stamps), collectible cardboard trading discs, memo boards, clipboards, paper coasters, post cards, place mats of paper, facial tissues, note cards, memo pads, note pads, ball point pens, crayons, felt tip markers, rubber bands, pencils, pen and paper holders, desktop document stands, scrap books, rubber stamps, drafting rulers, paper banners and flags, 3-ring binders, stationery folders, wirebound notebooks, portfolio notebooks, unmounted and mounted photographs, posters, calendars, bumper stickers, book covers, bookmarks, wrapping paper, children's activity books, children's coloring books; statistical books, guide books, and reference books, all in the field of basketball; magazines in the field of basketball, catalogs in the field of basketball, commemorative game and souvenir programs related to basketball, paper pennants, stationery, stationery-type portfolios, post cards, invitation cards, printed certificates, greeting cards, Christmas cards, holiday cards, informational statistical sheets for basketball topics; newsletters, brochures, pamphlets, and game schedules in the field of basketball; bank checks, check book covers, check book holders, comic books; non-magnetic credit cards and telephone calling cards not magnetically encoded; money clips.

Class 18

(1) electric motors and actuators for machines for use in electronic and mechanical aviation equipment to initiate, sustain and control motion or force in the aerospace and military industries

Class 09

(2) pressure sensors; inertial sensors; fluid level sensors; media quality sensors; seat belt tension sensors; position sensors; programmable digital readout counters; digital or analog readout devices , namely electrical regulators and controllers; readout systems, namely, electronic display interfaces; electronic control systems for machines, namely, microcontrols; solid-state relays; power, speed and temperature controls for aircraft; electric control devices for power, speed, and temperature; trackballs; navigation sub-systems for aircraft in the form of on-board computers; navigation sub-systems, namely, navigation apparatus for vehicles; cockpit operator controls, namely, aircraft cockpit control panels and modules; simulators for driving or control of vehicles, namely, cockpit operator controls; circuit protection devices, namely, circuit breakers, electronic circuit closers, circuit boards, and circuit overload protector devices; force sensors; optical scanners; electronic servo controlled circuits; electronic equipment for the detection, measurement or control of motion or pressure, namely, motion sensors, pressure gauges, pressure relief valves, pressure switches and motion detectors; accelerometers; potentiometers; shaft encoders for use with ink jet coding and marking printers and laser marking and coding apparatus; shaft encoders for longitudinal and angle measuring; linear encoders for longitudinal and angle measuring; gyroscopes; angular rate of change devices, namely, angular rate of change sensors;

micro-electromechnical structures, namely, electromechanical devices for preventing squirrels and other animals from accessing bird seed in feeders; fluidic control circuits; optical control circuits; angular rate of change sensors; angular rate sensors; Optical electronic encoders for converting position and motion into digital information; digital tachometer encoders for measuring speed, acceleration and deceleration of aircraft; Motor-Optical encoders for converting position and motion into digital information; programmable servo control units for industrial use for machines, consisting of digital servo drives; capacitive pressure sensors; sensors for detecting the quality of liquid or gas media; digital readouts, namely, electronic display interfaces; electrical controllers, namely, micro-controllers; electrical controllers, namely, micro-controllers for micro-programmable logic controllers, control relays, timers, counters, temperature controllers and safety relays; micro-programmable logic controllers, namely, micro-computers; electrical controllers, namely, micro-programmable logic controllers; control relays, namely, electric relays; electric relays, namely , control relays; digital timers for use in aircraft and other vehicles; Geiger counter; particle counters to measure air quality; counters, namely, thread counters; temperature controllers, namely, automatic temperature regulators for central heating radiators, electromechanical controls for room thermostats and thermostats; temperature controllers for controlling the temperature in rooms in which electronics are stored; safety relays, namely, electric relays of safety control systems; electrical safety relays; electrical solid state relays; navigation sub-systems for vehicles, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; electric or electronic sensors for monitoring rotation rate; electronic solid state contactors for use in controlling electric motors; electric timers for use in aircraft and other vehicles; optical encoders for converting position and motion into digital information; solid state angular rate sensors; rotation rate sensors; electronic multi-axis inertial sensors for guidance of vehicles; electronic three-axis inertial sensors for guidance of vehicles; electronic sensors for monitoring rotation rate; electric sensors for monitoring rotation rate; digital encoders for converting position and motion into digital information; radio transmitters and receivers; transmitters of electric signals; electronic transmitters and receivers for value measurement of pressure, temperature, and position ; electrical and electronic apparatus and instruments, namely breakers and disconnectors; motors and drive units for computer apparatus; electric motors, not for land use; power controllers and electric actuators; brushless dc electric motors and linear actuators for use with drives and controllers in electrically powered aircraft; electric motors for machines, namely, brushless dc motors and electric actuators, namely, linear actuators, all for use with drives and controllers; electronic logic controllers for industrial machinery; programmable logic controllers; software for the operation and control of pressure sensors; software for running automated installations; software for use in cockpit operator controls, namely, aircraft cockpit control panels and modules; software for the operation and control of electric relays; software for the operation and control of digital timers for use in aircraft; software for the operation and control of electric actuators for aircraft; software for the operation and control of electronic logic controllers for industrial machinery; pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry; position sensors, readout systems, namely, electronic display interfaces, pressure sensors, electrical controlling devices, namely, micro-controls, electrical solid-state relays, trackballs, electric actuators for industrial applications; position sensors, inertial sensors, navigation sub-systems, namely, navigation apparatus for vehicles, cockpit operator controls, namely, computers for managing control devices for aircraft, circuit overload protection devices, force sensors, pressure sensors, optical scanners and electronic servo controlled circuits for the aerospace and military industries; electronic equipment for the detection, measurement or control of motion or pressure, namely, sensors, accelerometers, potentiometers, shaft encoders, linear encoders, gyroscopes and angular rate of change devices, electronic servo control circuits, and micro-electromechnical structures, namely, pressure sensors, fluidic and optical control circuits

, accelerometers, gyroscopes and angular rate of change sensors; microprocessors; drive amplifiers; control units, namely, control panels; computer power supplies; high-frequency switching power supplies; uninterruptible power supplies; voltage stabilizing power supply; digital displays for use in aircraft cockpits; digital signage display panels; electronic filters for signal processing; electronic filters, namely computer screen filters; electric micro-circuits; alarm monitoring systems, namely, alarm systems, alarm detectors, and alarm transmitters; alarm detectors; alarm transmitters; central station receivers and decoders for receiving and processing information received from aircraft; central station receivers and decoders, namely, television receivers and decoders; industrial measurement instrumentation, namely, electric sensors, electronic transducers and controllers for use in measuring and controlling pressure, temperature, position, chemical composition, tilt and engine conditions, and for use as components of industrial equipment, namely industrial compressors, hydraulic fluid pressure regulators, steam sterilizers, laboratory test apparatus, chemical equipment, medical equipment, atmospheric pressure measurement equipment, machine tools, plant automation equipment, pneumatic and industrial plant pressure measuring and controlling equipment, and equipment for pressure measurements of aggressive fluids and in the automotive, aerospace, hvac (heating, ventilation, air conditioning), diesel, marine, medical and agriculture fields; software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines, or machine fleets, namely , aircraft cockpit controls; software for database management in the field of aviation and military aircraft; apparatus and instruments for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets, namely, electric measuring sensors, motion detectors, electric actuators, man-machine interfaces, namely, electronic display interfaces, data recorders, electric connectors, memory cards, network servers, communication networks, namely, network hubs, communication bus, namely, a communication hub, and touch screens; computer central processing units; remote data processing units; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking, supervision, life-saving, and teaching apparatus and instruments, namely, test equipment and equipment for measuring temperature, pressure and position; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, adapters, conduits, connection and distribution panels, electric accumulators, electric power converters and inverters, electrical pipes, electrical couplings, electrical capacitors, electrical conductors, electrical cables, millimeters; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electricity conduits; apparatus for recording, transmission and reproduction of sound or images, namely, CD players, compact disc players, DVD players, MP3 players, digital audio players, audio recorders; Blank magnetic data carriers; blank recording discs; automatic vending machines and control mechanisms for coin-operated vending and dispensing machines, namely cameras, software for motion and distance detection, infrared sensors, thermal sensors and displacement transducers; cash registers, calculating machines, data processing equipment, namely, computer scanners, laser scanners and optical scanners; fire-extinguishing apparatus, namely, fire extinguishers and fire extinguishing blankets; Radar detectors; pressure switches; pneumatic logic components, namely, pneumatic valves and pneumatic actuators; electro pneumatic valves; industrial vacuum components, namely, vacuum pumps, vacuum gauges, vacuum bottles, and vacuum cleaners for industrial purposes; Industrial vacuum components, namely, motors and pneumatic valves; air compressors; compressed air automation systems, namely, compressors; Electric motors for machines, namely, DC motors, brush dc motors, and brushless dc motors; brushed dc motors for use in industrial machinery; brushless dc motors for use in industrial machinery; rotary voice coil actuators for use in automated industrial machinery; electric rotary voice coil actuators; linear voice coil actuators for use in automated industrial machinery; electric linear voice coil actuators; smart voice coil actuators for use in automated industrial machinery; electric smart voice coil actuators; brushless dc motor electronic controllers; dc motor electronic controllers; brush dc motor electronic controllers; electric voice coil actuators; global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; electronic navigational instruments, namely, inertial navigation systems; inertial measurement unit, namely, an electronic device for measuring and reporting position, force, acceleration, angular rate, and magnetic fields, using accelerometers, sensors, gyroscopes, and magnetometers; multi-axis inertial sensing system , namely, a system of multiple sensors, gyroscopes, accelerometers, and magnetometers for measuring and reporting position, force, acceleration, angular rate, and magnetic fields; angular gyroscope; analog gyroscope; remote control circuit breakers; circuit breakers; simulators for driving or control of vehicles, namely, cockpit controls; speed brake; landing gear control; steering handwheel; flight spoiler control level; Optical rotary encoders for tracking shaft rotation to generate digital position and motion information; Magnetic rotary encoders for tracking shaft rotation to generate digital position and motion information; hall effect sensors; rotary and linear potentiometers; draw wire sensors; inclinometers; electronic modules, namely, integrated circuit modules; electronic display interface, namely, wireless encoder interface; inductive proximity sensors; inductive sensors with remote electronics; electronic display interface, namely, digital readout systems; ceramic capacitive pressure sensors; silicon capacitive pressure sensors; panel mount solid state relays; PC board mount solid state relays; din rail mount solid state relays; plug-in solid state relays; solid state relay timers; control solid state relays; digital input and output scanners; integrated circuit modules, namely, digital input/output modules; heat sink and solid state relays assemblies; electrical limit switches for use in industrial machinery; electric limit switches for aerospace and defense applications; limit switches for industrial applications; electrical micro-switches; manually operated power switches; electrical power distribution blocks; electric power generators; electric power converters; power amplifiers; power transformers; power technologies, namely, switches; high-frequency switching power supplies; power switching, namely , power switches; power management, namely, power equipment for power switching; power storage, namely, electrical storage batteries

Class 16

(3) Printed matters, namely, printed calendars; brochures, catalogues and leaflets; user and instruction manuals; user and application guides

SERVICES

Class 37

(1) remote maintenance of automated installations, of machines and of parts of machinery, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 38

(2) telecommunication services, namely transmission by satellite of technical data and technical information in the field of the state and the operation of automated installations, of machines and of parts of machinery, namely, measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens; remote management services (supervision and checking) of automated installations, of machines and of parts of

machinery via Internet, namely, of measuring sensors for pressure, motion detectors, proximity detectors, thermal detectors, electric actuators, mechanical actuators, man-machine interfaces comprising video display terminals, computer terminals, computer monitors, computer screens, computer servers, computer terminals, informatics buses and computer touchscreens

Class 40

(3) custom manufacture of sensors; custom manufacture of pressure sensors; custom manufacture of inertial sensors; custom manufacture of fluid level sensors; custom manufacture of sensors for detecting the quality of liquid or gas media; custom manufacture of position sensors; custom manufacture of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom manufacture of programmable logic controllers; custom manufacture of logic controllers; custom manufacture of control relays; custom manufacture of timers; custom manufacture of counters; custom manufacture of temperature controllers; custom manufacture of safety relays; custom manufacture of micro-controls; custom manufacture of solid state relays; custom manufacture of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom manufacture of electronic motors; custom manufacture of actuators; custom manufacture of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom manufacture of force sensors; custom manufacture of navigation sub-systems; custom manufacture of media quality sensors; custom manufacture of seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; custom manufacture of industrial measurement instrumentation, namely, sensors, transducers and controls; custom manufacture of industrial measurement instrumentation; custom manufacture of position detectors; custom manufacture of pressure switches; custom manufacture of pneumatic logic components; custom manufacture of electro pneumatic valves; custom manufacture of industrial vacuum components; custom manufacture of compressed air automation systems; custom manufacture of DC motors; custom manufacture of brush dc motors; custom manufacture of brushless dc motors; custom manufacture of rotary voice coil actuators; custom manufacture of linear voice coil actuators; custom manufacture of smart voice coil actuators; custom manufacture of brushless dc motor controllers; custom manufacture of dc motor controllers; custom manufacture of brush dc motor controllers; custom manufacture of voice coil actuators; custom manufacture of GPS; custom manufacture of inertial navigation systems; custom manufacture of inertial measurement unit; custom manufacture of multi-axis inertial sensing system; custom manufacture of angular gyroscope; custom manufacture of analog gyroscope; custom manufacture of remote control circuit breakers; custom manufacture of circuit breakers; custom manufacture of timers; custom manufacture of relays; custom manufacture of control relays; custom manufacture of counters; custom manufacture of safety relays; custom manufacture of temperature controllers; custom manufacture of cockpit controls; custom manufacture of speed brake; custom manufacture of landing gear control; custom manufacture of steering handwheel; custom manufacture of flight spoiler control level; custom manufacture of optical rotary encoders; custom manufacture of magnetic rotary encoders; custom manufacture of hall effect sensors; custom manufacture of rotary and linear potentiometers; custom manufacture of draw wire sensors; custom manufacture of inclinometers; custom manufacture of electronic modules; custom manufacture of wireless encoder interface; custom manufacture of inductive proximity sensors; custom manufacture of inductive sensors with remote electronics; custom manufacture of digital readout systems; custom

manufacture of linear encoders; custom manufacture of digital readout encoders; custom manufacture of ceramic capacitive pressure sensors; custom manufacture of silicon capacitive pressure sensors; custom manufacture of panel mount solid state relays; custom manufacture of PC board mount solid state relays; custom manufacture of din rail mount solid state relays; custom manufacture of plug-in solid state relays; custom manufacture of solid state relay timers; custom manufacture of control solid state relays; custom manufacture of digital input/output modules; custom manufacture of heat sink and solid state relays assemblies; custom manufacture of limit switches for industrial applications; custom manufacture of limit switches for aerospace and defense applications; custom manufacture of limit switches; custom manufacture of microswitches; custom manufacture of manually operated switches; custom manufacture of power technologies; custom manufacture of power switching; custom manufacture of power management; custom manufacture of power storage

Class 42

(4) custom design and engineering of sensors; custom design and engineering of pressure sensors ; custom design and engineering of inertial sensors; custom design and engineering of fluid level sensors; custom design and engineering of sensors for detecting the quality of liquid or gas media; custom design and engineering of position sensors; custom design and engineering of micro-controls; custom design and engineering of micro-controls for micro-programmable logic controllers, control relays, timers, counters, temperature controllers, and safety relays; custom design and engineering of micro-programmable logic controllers; custom design and engineering of programmable logic controllers; custom design and engineering of logic controllers; custom design and engineering of control relays; custom design and engineering of timers; custom design and engineering of counters; custom design and engineering of temperature controllers; custom design and engineering of safety relays; custom design and engineering of solid state relays; custom design and engineering of electronic motors and actuators used in electronic or mechanical equipment to initiate, sustain or control motion or force; custom design and engineering of navigation sub-systems, namely, inertial measurement units, micro-electro-mechanical systems, inertial navigation systems, and accelerometers; custom design and engineering of force sensors; custom design and engineering of pressure sensors, inertial sensors, fluid level sensors, media quality sensors and seat belt tension sensors for the automotive industry, position sensors, readout systems, pressure sensors, micro-controls, solid-state relays, trackballs, motors and actuators for industrial applications, and position sensors, inertial sensors, navigation sub-systems, cockpit operator controls, circuit protection devices, force sensors, pressure sensors, optical scanners and servo systems for the aerospace and military industries; remote supervision, control, and monitoring of automated installations, machines or machine fleets; design and development of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; installation, maintenance and updating of software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; online provision of computer applications and software for the management, control, monitoring, maintenance and remote diagnosis of automated installations, machines or machine fleets; remote management, supervision, and control of computer installations, machines or machine fleets via communication systems; research, design and consultancy services in the field of electrical and electronic apparatus and instruments; custom design engineering and consultancy services; customized product design services; custom design and engineering of position detectors; custom design and engineering of pressure switches; custom design and engineering of pneumatic logic components; custom design and engineering of electro pneumatic valves; custom design and engineering of industrial vacuum components; custom design and engineering of compressed air automation systems; custom design and

engineering of DC motors; custom design and engineering of brush dc motors; custom design and engineering of brushless dc motors; custom design and engineering of rotary voice coil actuators; custom design and engineering of linear voice coil actuators; custom design and engineering of smart voice coil actuators; custom design and engineering of brushless dc motor controllers; custom design and engineering of dc motor controllers; custom design and engineering of brush dc motor controllers; custom design and engineering of voice coil actuators; custom design and engineering of GPS; custom design and engineering of inertial navigation systems; custom design and engineering of inertial measurement unit; custom design and engineering of multi-axis inertial sensing system; custom design and engineering of angular gyroscope; custom design and engineering of analog gyroscope; custom design and engineering of remote control circuit breakers ; custom design and engineering of circuit breakers; custom design and engineering of timers; custom design and engineering of relays; custom design and engineering of control relays; custom design and engineering of counters; custom design and engineering of safety relays; custom design and engineering of temperature controllers; custom design and engineering of cockpit controls; custom design and engineering of speed brake; custom design and engineering of landing gear control; custom design and engineering of steering handwheel; custom design and engineering of flight spoiler control level; custom design and engineering of optical rotary encoders; custom design and engineering of magnetic rotary encoders; custom design and engineering of hall effect sensors; custom design and engineering of rotary and linear potentiometers; custom design and engineering of draw wire sensors; custom design and engineering of inclinometers; custom design and engineering of electronic modules; custom design and engineering of wireless encoder interface; custom design and engineering of inductive proximity sensors; custom design and engineering of inductive sensors with remote electronics; custom design and engineering of digital readout systems; custom design and engineering of linear encoders; custom design and engineering of digital readout encoders; custom design and engineering of ceramic capacitive pressure sensors; custom design and engineering of silicon capacitive pressure sensors; custom design and engineering of panel mount solid state relays; custom design and engineering of PC board mount solid state relays; custom design and engineering of din rail mount solid state relays; custom design and engineering of plug-in solid state relays; custom design and engineering of solid state relay timers; custom design and engineering of control solid state relays; custom design and engineering of digital input/output modules; custom design and engineering of heat sink and solid state relays assemblies; custom design and engineering of limit switches for industrial applications; custom design and engineering of limit switches for aerospace and defense applications; custom design and engineering of limit switches; custom design and engineering of microswitches; custom design and engineering of manually operated switches; custom design and engineering of power technologies; custom design and engineering of power switching; custom design and engineering of power management; custom design and engineering of power storage

CLAIMS

Proposed Use in CANADA on goods and on services

Application Number 1,758,172 **Filing Date** 2015-12-07
Language of Application English

Index Headings
REALL

Image Description (Vienna)
- Cubes
- Lines or bands forming an angle -- Note: Including chevrons and arrowheads formed by lines or bands.
- Arrowheads -- Note: Not including arrowheads in the form of angles (26.3.23).
- Red, pink, orange
- Black

Colour Claim
Colour is claimed as a feature of the trade-mark. The mark consists of a red cube design underneath a red rectangular structure bent at ninety degrees over the cube, adjacent to the word reall, with the letters re in black and the letters all in red.

SERVICES

Class 35

(1) Advertising, marketing and promotional services, namely, advertising the services of others, marketing and promoting the services of others through the distribution of printed and electronic material relating to social enterprises, all in the field of affordable housing; business analysis, research and information services, namely, providing business information, market analysis and technical information, all in the field of affordable housing; business assistance, management and administrative services, namely, providing business advice and technical assistance in the field of affordable housing to assist other enterprises to develop as viable social mission businesses.

Class 36

(2) Fundraising; real estate services.

CLAIMS

Used in CANADA since at least as early as June 04, 2014 on services. Priority Filing Date: EUIPO (EU) November 23, 2015, Application No: 014816144 in association with the same kind of services

WE'RE WITH YOU

Goods

Class 09

(1) telephone smart cards; smoke detectors; motion detectors; personal security alarms; VOIP phones; LAN (local area network) computer cards for connecting portable computer devices to computer networks

Class 16

(2) pre-paid telephone calling cards

SERVICES

Class 37

(1) installation and repair of telephones; installation of telephone lines; home security installation advisory services; burglar alarm installation and repair

Class 38

(2) telecommunication bundle services that allow customers to reach cellular phones, voicemail and call routing between wireline and wireless phones and voicemail boxes; electronic mail services through wired and wireless access, paging services, wireless digital messaging services; providing e-mail fax services; television and radio broadcasting services; cellular telephone communication; communication by mobile telephone; communication by telephone; Internet service provider (ISP) services; local and long distance telephone services; operating a wide-area network (WAN); operation of a cellular phone network; personal communication services (PCS); providing multiple use access to global computer information networks for the transfer and dissemination of a wide range of information; providing multiple user access to a computer network; providing user access to global computer networks; providing virtual private network (VPN) services; provision of access to the Internet; recording, storage and subsequent transmission of voice and text messages by telephone; rental of modems; rental of telephones; teleconferencing and video conferencing services; telephone carrier services provided by means of fibre optic cables; voice mail services; voice messaging services; voice-activated dialing services; providing email services; wireless digital messaging services; wireless facsimile mail services; wireless fax services; wireless telephone services; wireless voicemail services

Class 42

(3) cloud computing web hosting services

Class 45

(4) operation of a web site that provides online social networking; registration of domain names for identification of users on a global computer network; monitoring of burglar alarms and security alarms; monitoring of home security services; monitoring telephone calls from subscribers and notifying emergency facilities

CERTIFICATION MARK

FUNDGRADE A+

Certification Mark Text
Funds are rated according to the standard at the end of each calendar year by individuals in the Fundata Analytics and Data department who have university degrees in either business, finance, economics, accounting or actuarial science. The FundGrade rating system evaluates funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn an A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. The FundGrade A+ uses a GPA-style calculation, where each monthly FundGrade from "A" to "E" receives a score from 4 to 0, respectively. A fund's average score for the year determines its GPA. Any fund with a GPA of 3.5 or greater is awarded an FundGrade A+ Award. For more information, see www.FundGradeAwards.com.

Image Description (Vienna)
- Rhombs or squares standing on one of the corners thereof
- One quadrilateral
- Quadrilateral figures with one or more convex or concave sides -- Note: Not including elongated surfaces with one or more convex or concave sides (25.3.1).
- Quadrilaterals containing one or more triangles or lines forming an angle
- Quadrilaterals with dark surfaces or parts of surfaces
- Several triangles, juxtaposed, joined or intersecting
- Triangular figures with one or more convex or concave sides
- Red, pink, orange
- Green
- Blue
- Yellow, gold

Colour Claim
Colour is claimed as a feature of the trade-mark. The trademark consists of six intersecting coloured triangular shapes which together form a squared diamond. The four tips of the squared diamond are at the top, bottom, left and right of the trademark. The various intersections between the constituent triangular shapes creates 14 separate coloured segments. There are four principle colours in the trademark - red, yellow, blue and green - which overlap among the 14 segments to

create different shades of those colours. Those segments are coloured as follows: 1. the triangular segment which stretches right from the left tip of the squared diamond is burgundy 2. the quadrilateral segment to the right of that triangle is dark red 3. the large triangular segment to the right of that segment (which stretches to the upper tip of the squared diamond) is red 4. the triangular segment to the right of that segment is dark red 5. the trapezoidal segment beneath that segment is yellow 6. the quadrilateral segment beneath that segment (which stretches to the right tip of the squared diamond) is dark yellow 7. the equilateral triangular segment to the lower left of that segment is light blue 8. the triangular segment to the right of that segment (which stretches to the right tip of the squared diamond) is dark blue 9. the quadrilateral segment to the left of that segment is blue 10. the large triangular segment to the left of that segment (which stretches to the lower tip of the squared diamond) is light blue 11. the triangular segment to the left of that segment is dark green 12. the trapezoidal segment above that segment is light green 13. the quadrilateral segment above that segment (which stretches to the left tip of the squared diamond) is green 14. the equilateral triangular segment to the upper right of that segment is light blue

- Several quadrilaterals juxtaposed, joined or intersecting

- Rectangles
- Inscriptions in other characters
- Black
- Yellow, gold
- Brown
- White, grey, silver

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a black rectangle with a border containing repetitive gold diamond designs outlined in black and with small gold diamonds in the background. The border also contains ten larger diamond designs consisting of three diamond designs on the top and bottom and two diamond designs on the left and right sides which are gold with no black outline. A thin gold border surrounds the inside of the outer border. Inside the black rectangle is a gold horseshoe with a flat bottom. On the flat bottom of the horseshoe design is the wording "2004" and two scroll designs in brown. At the top of the horseshoe design is a depiction of a face with black hair, eyebrows and pupils, brown skin and white iris' surrounded by a gold circle. On the left and right sides of the gold circle appear depictions of hops and barley in gold and outlined in black. The inside of the horseshoe design contains a decorative scroll design in gold below the depiction of the face. The wording PRIDE AND EXCELLENCE appears directly below the scroll design in gold. The non-Latin characters and the word HABESHA appear directly below the wording PRIDE AND EXCELLENCE and are gold.

Foreign Character Translation/Transliteration

As provided by the applicant, the non-latin characters transliterate to 'HA-BESH-A'. The word HABESHA translates in English to people from Ethiopia and people from Eritrea.
